

attaching kickboards

equipment required

- **Cordless drill**
- **Drill bits:**
No 2 screw tip, 4mm bit, No 12 countersinking bit
- **Tape measure**
- **Electric planer**
- **Low adhesion masking tape**
- **Pencil**
- **Safety gear:**
Safety glasses, ear muffs, dust mask

important tips

- Plumbing and electrical work must be carried out by a licenced trades person.
- Assemble on a soft surface to ensure the cabinetry doesn't get scratched.
- Wear appropriate safety gear during assembly.
- To securely mount the cabinets on a stud wall, use at least 8-gauge screws that are 65mm in length. However, if your wall is made of concrete, brick, or a different material, consult with an expert to determine the appropriate fastening method.
- Remove any protective wrapping before getting started

assembly instructions

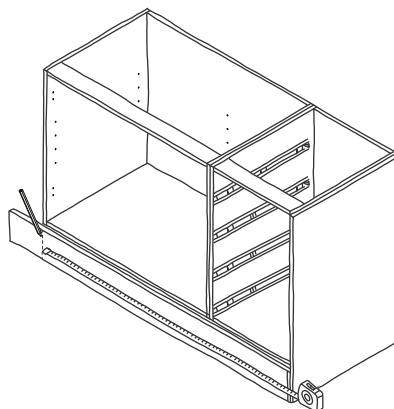

step 1

measuring and attaching kickboards

1

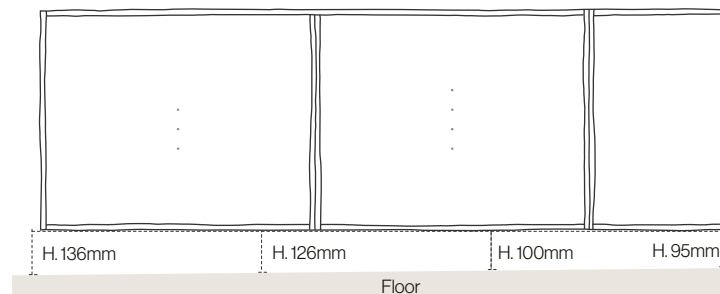

Measure the correct length of your kickboard and cut to size.

Note: Use masking tape on the area that needs to be cut for a neater cut.

2

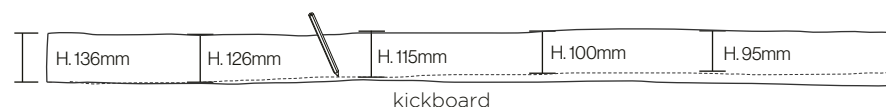

Ensure the kickboard will fit evenly with the cabinetry and floors by measuring the height from the floor to the bottom of the cabinetry. This is most accurate by measuring in intervals along the cabinet.

3

Measure the correct length of your kickboard and cut to size.

Note: Use masking tape on the area that needs to be cut for a neater cut.

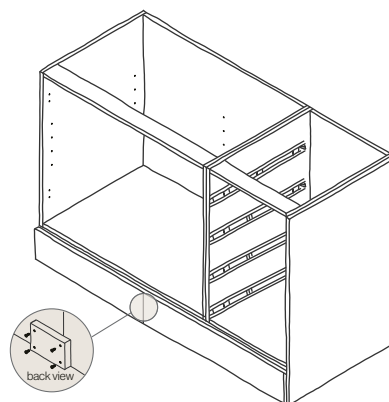

4

Measure the correct length of your kickboard and cut to size.

Note: Use masking tape on the area that needs to be cut for a neater cut.

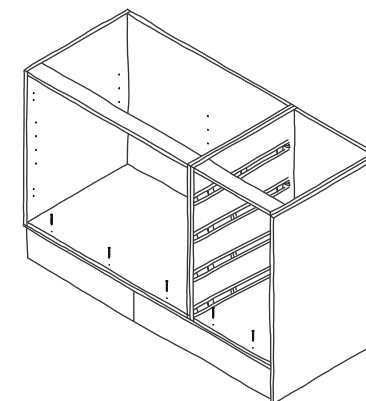

Tip: For a neater, more stable join of the kickboards, screw on a kickboard or timber off-cut to the back of the kickboard panels.

5

Attach the kickboard to the cabinets by screwing down into the top of the kickboard using 28mm screws.

The screws need to be 50mm back from the front of the cabinet to align with the kickboard.
